PROFESSIONAL EXPERIENCE

CAPGEMINI TECHNOLOGIES LTD, Mumbai
Senior Consultant, May 2014 - Present

I have been with the company for about 6 years now and was recently promoted for my excellent work and contribution. As an Android technical lead, my main responsibilities are determining and designing the architecture of applications, technical guidance to juniors and subordinates, business requirement analysis and implementation, development and support. Below are some keynote projects:

- **McDonalds GMA** – Global application of McDonalds to cater their customers to place and manage their food orders. I am involved the application development of UK variant of McDonalds.

- **Sales Force (Cargill, Brazil)** - Internal app for client for its sales team which is used to create and submit orders and view order history for its customers. We used SAP Mobile SDK for first time in our organization for performing CRUD operations seamlessly with backend SAP system. Recently released on Play Store.

- **Wit Gele Kruis (Belgium) -** Internal Hospital app for nurses visiting patients at home and keep track of medical records. Complex project due to its predefined requirements pertaining to medical practices and processes of hospital. Successfully delivered the project in requisite time.

- **mAssist (Reliance Jio) -** Internal app for Reliance Jio agents, to assist customers in their account management, issues and orders. This greatly enhanced the launch process of product in market for the client. Currently is India pan launched across Reliance Stores.

- **Jio Newspaper (Reliance Jio) -** Application for users to download and read major newspapers on devices in form of epaper.

INFOSYS LTD, Pune
Senior Software Engineer, Sep 2010 - Apr 2014

Started out fresh as campus placement and underwent the grueling 4 months intense training. Also promoted here for my excellent work. My main responsibilities for requirement analysis, application development, defect resolution and support. Below are some keynote projects:

- **MetroPcs (USA) -** Responsible for the redesigning of client website using web technology and tools like Adobe CQ5 for content design and management.

- **T-Mobile (USA) -** Responsible for redesigning of client website in desktop and mobile formats using web technology and tools like Adobe CQ5 for content design and management.

- **Xfinity (Comcast, USA) -** CMMI level-5 Android project for US customers with over 5 million downloads. App provides services such as email, messaging, voicemails, internet calling, online contacts, groups, favorites, caller-id etc. I was responsible for design, development and issues resolution support of application and have been part of 11 successful deliveries of app on Google Play.
